Chapter 8 - That Place	21

## **DEDICATION**

*To all my dear brothers who have accompanied me forming the restoration for this People...*

*We have seen many sunny mornings and the sunsets of many summer days, forming a harmony with the dawn...*

*The dawn traces new courses in our Spiritual journey and also announces the sunset of a race, which has lived in waiting for better times, without understanding that nothing in life can get better if we do not change our behaviour.*

*I harbour the hope of a People heading towards its triumph, but in my heart remains the deep pain for a humanity, which overwhelmed by its own ignorance is succumbing...*

*What pain ! After having seen Christ on the pathways , in the countryside and in the cities, preaching his Doctrine, with humanity censuring him, condemning him and yet convinced that one day Christ will come again to judge the living and the dead, and everyone convinced that they will be selected among the chosen to continue living an eternal life, sharing with Him at the right hand of God the Father, such is the ignorance, such are the people, such are the masses...*

*All the efforts which have been made through time are not sufficient to make us conscious of our own nothingness...*

*Blessed are the men and women, who in good time accept the Message, who in good time accept Christ and who each day add to the restoration so that these valient souls be integrated in a task, which without break all of us must carry out.*

*The days go by... the nights go by... the clouds come and go, wars exterminate the human species, diseases will wipe out the masses,*

*man will be the whip of the People, but the Conscience which we manage to integrate within our Work will not succumb, will be beyond good and bad, beyond forms, beyond dangers, as a testimony to the imperishable, to that which is united with the Almighty.*

**V.M. LAKHSMI**

## CHAPTER 1 : MAN AND THE ELEMENTS

On Planet Earth, we find innumerable creations, every one of which occupies its specific place according to the mission which it has to fulfill on the Planet.

For example: the seas and rivers are creations which God has made and carry out their mission day and night; the plants collectively form the vegetation which covers the earth's epidermis; the animals are disseminated across the whole planet, each one preserving its species through a Natural Law.

Mankind was also created to occupy his place and to rule. Given that he has a mind and the use of reason, disobedience was born within him and he fell into violation of the Law (of keeping himself within the order of Creation) ; he contaminated himself with customs, vices and brutal animal instincts, ceasing to be the King or Conductor of the Lesser Kingdoms of which he was meant to be the Instructor or Guide.

As he lost his kingship and spiritual grades it was necessary for Nature to refurbish these kingdoms with Ineffable Beings to continue directing them internally, since Man, because of his spiritual decadence was unable to continue doing so.

Before losing these values Man was a Deva, who had a physical body and the power of speaking to and instructing the Elementals of Nature and also the power of making himself obeyed.

Today all these species of plants and animals have Devas which instruct and direct them, leaving man, of course, excluded from this power. In the same way the Earth with its thousands of Elementals, the Gnomes and Pygmies, also ceased to obey him, because he had lost his Sceptre of Power and had no dominion over her, resulting in the appearance of the Regents which had the power of directing all these Elemental Creatures of the Earth.

In those times , a man could command the Elementals of the Earth, could order earthquakes or telluric movements at will and could also prevent them from happening through the power of the word.

On losing these faculties man became subject to Extermination from these Devic Gods for not having maintained the powers which God had given him.

In the same way, we see that on losing these faculties, he also lost his power over the waters. With the appearance of the Deva-Gods, exercising their great power over the waters, man was left exposed and subject to extermination by the fury of the oceans and waters.

The same happened with the air, for as man lost his faculties he fell into mental degeneration, with an immense struggle of subjective thoughts moving inside him and enslaving him; there was the necessity for the Devic Gods of the air to take their regency, leaving man exposed to being wiped out by great cyclones and violent reactions of the Element air, without him having any power over it.

Finally, having lost his Faculties, his Purity and his Chastity he was left subject to destruction by the Element Fire, as will happen with the termination of this Race, which man is powerless to prevent.

The day in which man reconquers his Powers, his Purity and his Sceptre of Power, he will live within a new world, where the Elements which compose it will obey him and where he will make himself King.

## CHAPTER 2 : MAN AND HIS MISSION

As we have seen in the previous chapter, when man was created in the image and likeness of GOD, he was given extraordinary powers with sensory and extra-sensory faculties, which means he was truly illuminated, a King, because he was the son of GOD and GOD makes his son a King, just as was demonstrated to us by CHRIST.

Ruling for a time, Man instructed the Elementals and in turn received teaching and protection from them.

In the measure in which Man broke away from the ordinances laid down for him by the CREATOR, he lost his faculties and consequently his powers. It was in this way that he disjointed himself from the integration which he had with the Planet, leaving himself in inferior conditions to the Planet subject to the regency of a larger number of Laws.

The Planet was given regents which govern the Elements, for example:

The Element Earth is ruled by : Kitichi, Bragma, Gob and Abarman

The Element Water is ruled by : Varuna and Narayana

The Element Air is ruled by : Pavana and Ishuara

The Element Fire is ruled by : Agni and Rudra

These Gods command the columns of Elementals of each Element and in the same way rule our own internal Elementals.

Because of this every reaction in Nature has a direct repercussion in our body; and the human beings, as we have already said, have no power whatsoever to avoid this.

Man's mission in accordance with the designs of GOD, is to begin by dominating his own self, becoming his own master, which means reconquering his lost powers and acquiring dominion over his own Elements thereby regaining the integration with the power he should have over the Element Earth, the Element Water, the Element Air, and the Element Fire, conquering again the power which he acquired in the Creation.

The man who has made himself King commands his own Nature with the power of the Word and subsequently also commands external Nature; which means that wherever this Solar Man may be, he has at his service millions of creatures to accompany and help him making him a terribly powerful God.

He can make the Earth bear better fruits, can work for the benefit of humanity and Universal Medicine, giving the most sublime teachings of the Universe, helping humanity and Nature in their difficult processes, creating vortices of energy which help people physically and spiritually, sharing with Gods and men in the same banquet; which is to say, "He will have new lands and new heavens around him".

If one Solar Man can do all this with his flaming powers, how much more could be done by a group of men and women working in this scheme of things!

## CHAPTER 3 : THE PLANET

Because there is a relationship between the Elements which make up the Planet and the Elements which conform man, the measure in which he fell was the measure in which he lost his spiritual values.

The aura of the planet became trapped by this force, forming a certain antagonism which led to the contamination of each one of its Elements.

We cannot detect these phenomena with our physical eyes, but through an objective investigation the following can for example be affirmed: the emanations produced by the laziness, bad will and inertia of peoples bodies charge the earth with this energy making it each day less harmonious for obtaining peace of Spirit.

The waters are charging up with forces of such density from the emanations of lust, lasciviousness and brutal instincts that through time, over the centuries, all water vapours have these characteristics.

The emanations from the millions and millions of mental waves and negative venenoskirian thoughts produce this disharmony in the airs.

The same occurs with the Element Fire, which is not a physical fire, but an igneous fire, which envelops the Planet; there being so many passions, so much anger, soberbia, pride and every kind of violent discharges within humanity, these brutal energies become part of the Planet's atmosphere, producing an enormous disharmony with the Infinite, inciting people to fall into every kind of disorder.

These are infrared luciferic forces, which cannot be disintegrated en masse, but by the individual work of each person, or in the absence of this, by a violent action of Nature, availing herself of the igneous fire in the interior of the Planet and of course taking hundreds of years to burn all infection caused by these luciferic forces.

The same process has to be used in the case of each person who proposes to carry out the Great Task; it is through fire that they purify themselves, through rigorous disciplines and organised processes.

In the measure in which the Task is carried out in a person, they become integrated with the Laws which originated Creation and so successively with each one of the members also doing the work.

It is for this reason that the People, which is carrying out the Work, will be taken away to a safe place; thusly giving time and space so that Nature can carry out all those events which have to do with the purification of the Planet making it apt to shelter a new race.

## **CHAPTER 4 : THE ORGANIZATION OF A PEOPLE**

Gnostic teaching has as its foundation a Doctrine and with it an organization. It is therefore of vital importance that each one of its members understands the work which he is undertaking and the place which he occupies within the organization; for example: a directive of any level must understand that the progress of those under his guidance bears an intimate relation to his own spiritual advancement.

In the same way, a person who has no position of responsibility within the organization, should know that although on the earth he has no institutional responsibilities, within the work of the group, he is part of an army which complies with internal regulations.

The People must know that as a whole, the mission which each person carries out is the same as that which the CHRIST carries out, as the expression of that multiple unity with its respective perfection.

The People must have a perfect organisation before beginning the journey, for example: being conscious of the mission which GNOSIS fulfills in the present times, being conscious that this is a calling which the CHRIST makes from inside us, being conscious that this our last opportunity in this epoch, being conscious that no one is above anyone else, that we are all simply soldiers in this noble cause; understand that the more we delay in taking serious decisions, the greater the advantages the negative forces have over the advance of the individual and the People.

The People should carry the emblem of “Love” and “Wisdom” as the elements which will allow us the triumph.

Each one of these travellers must be rid of all religious fanaticism, every class of politics, racism and frontiers.

The People should see all the systems of the earth as the functions of a race lacking in any objective spiritual projection; in this way it can be

equal with everyone, since what interests this People is serving humanity, serving the CHRIST and not having any class of kingdoms on earth.

In this way we are being prepared so that in the necessary moment we have no other interest except saving our Conscience and saving a body which we need for continuing our Work.

The improvement of our conduct, our behaviour, our integration with the community, sociability, are transcendental for the reeducation we need to have before the journey.

The men and women of the New Era should be prepared for the Light of the CHRIST, the Revolution of the Conscience and the will of the two to be present in the formation of these new generations.

The Light of the Era of Aquarius will act in each one of us according to the simplicity we have in our life and our efforts in integrating with the Great Work.

## CHAPTER 5 : OUR NORTH

The Gnostic People which is realising a serious, responsible, organised and directed Work should use as a reference point for the encounter with this great event the following points:

- 1- The Doctrine which is preached and practised.
- 2- The updated Message which is being given.
- 3- The CHRIST, who is directing the People, physically and internally.

In the present chapter we make allusion to the North indicated on the compass; the force of magnetic North makes the compass point in this direction. In our case it is the physical and internal calling we are receiving that makes us swing towards the CHRIST.

For this to happen it is of vital importance for each student of the path to maintain this tonic of work and alertness in order to respond at every instant to this calling.

The Gnostic People is connected to these currents of the SPIRIT by the Conscience, by the Doctrine and by the Liturgy. These are the determining factors for this eternal present which we need to form around our Work.

The Light of Aquarius is in these moments the conductor of the bio-electro-magnetic currents which unite the People with the Aura of the Universe and consequently the Aura of our REDEEMER, or the CHRIST.

Once the Aura of the People has entered within the parameters of the Aura of the Universe, the Army of the Voice or Jehovistic Angles direct the Gnostic People towards that previously prepared place where it may live and give testimony to the fulfillment of the Sacred Scriptures.

The place to which we are referring is a paradisiacal place, established in a secret part of our planetary geography.

It is from there that the MASTERS of the WHITE BROTHERHOOD are making all the necessary preparations so that the rescued people can live and continue improving its physical, mental and spiritual conditions, with a view to forming the basis for a new human progeny, the Great Sixth Race, which will inhabit our Planet in order to fulfill that Cosmic Plan to harbour seven races, each with their seven sub-races.

This secret and sacred place has already reunited all the the species of life which are disseminated across our Planet, the plants and animals, thusly repeating that biblical event, when Noah buit his great Arc and took into it pairs of all the species of animals.

It is known to all of us students of the Path, that this Arc is the Table of Salvation which the Lord gave to a People, so that through compliance with his Laws, it might enter into it and obtain a physical salvation with projections to a spiritual salvation.

## CHAPTER 6 : THE PROMISED LAND

In this chapter we will talk about an aspect which is of great transcendence to us.

Having spoken in previous chapters of the journey and its conditions, we should say that there are two types of PROMISED LAND:

*One is related entirely to a spiritual process, to which the Holy Scriptures make allusion, when they say that the biblical Moses did not enter into the Promised Land...*

*As we have already said, this a spiritual aspect, since Moses did not manage to crown the whole of his journey; he reached BINAH and died seeing CHOKMAH at a great distance, by which we mean the CHRIST or the PHILOSOPHICAL STONE.*

*The second Promised Land is that which the Bible also mentions to us, where a Select People will be taken, so as not to perish in the events which are to occur at the end of the race.*

As the Silver age of the present race came to an end, by a Divine order, this Promised Land passed to occupy a place in the fourth dimension, an event which occurred exactly half way through the race, so that this sacred place should not be not stained with the perversity of the race in its Copper and Iron age; it is for this reason that in this place there is not a trace of the contamination or perversion which would affect the progress or spiritual advance of the People which is to be taken there.

As we can see the Golden age is Solar, governed by the Sun, and the Silver age is Lunar governed by the Moon; the copper age is ruled by Passion and the Iron age by innumerable cruelties and animal instincts.

In the moment when this place was chosen it began to be guarded by the Higher Brothers from space, so that no kinds of unhealthy influences could reach there, producing disorders.

As the Iron age of this race began the different species of the more evolved animals began to be taken there to begin forming an ecological harmony between the waters, the earth and the air, a task carried out by the Nature's Devas.

In a progressive, but balanced way some people have taken there to serve as the human element in this equilibrium.

In this way the earth, the water and the air of this holy place have been taking on the expression of life, which maintains a correlation with the mission this place has and the life which is to develop there.

With the arrival of the Gospel which corresponds to this earth race to live, certain secret atmospheric spaces opened, so that the people who are entering into the parameters of this Divine Plan and this place, begin indirectly having a degree of familiarity; which is to say, we are seeing how our students, serious and mature in their spiritual aspect, harmonise in an extraordinary way with nature, the country, the greenery and those natural marvels which characterise our countryside; a human and spiritual harmony being previously processed as a natural preparation for this People which is to be rescued.

This Sacred Place proportions to that future humanity abundance in spirituality, in harvests, in health, in peace and in love, due to the preparation the People has previously had, the preparation of the place and the presence of Divinity.

This place, where the rivers flow with milk and honey, the milk represents the grace of Nature and of MOTHER KUNDALINI, the honey represents the love and harmony of the place and from the heavens it will rain Mana, the symbol of Divinity.

Such is this site, Sacred place, full of presages, full of mystery, full of peace and harmony, this is the PROMISED LAND for a Saintly People,

which tired of suffering, tired of so much badness, tired of so much perversity, prefers to submerge itself within the Grace of GOD and within the Mysteries of Nature and the Cosmos availing itself of all these Graces to serve GOD in the Great Work.

## CHAPTER 7 : PRELIMINARY ORIENTATIONS

The Gnostic People which has stood firm, trusting in the instructions emanating from the Avatar, V.M. SAMAEAL AUN WEOR, which accepts his Gospel and hence his Doctrine, should keep a keen eye open not to fall into confusions from foraneous teachings which have begun proliferating through different means and logically, through people who do not have precise and clear information, because they collect facts from unreliable sources.

When a disciple asked CHRIST: “When will all these things come to pass?”, he replied: “Noone knows, only the Father who is in Heaven”.

The same thing occurs in the present age; noone knows, except the Father. What we do know from direct information is that these events are very close by and this is why precise information with a spiritual and human connection is being given.

Every person militating in the Great Work should have as their basis the following things:

- *The Doctrine*
- *The Teaching and*
- *The Orientation which is being given*

Let us remember that in these final times there will appear many false Apostles, teaching foraneous Doctrines, twisting and adulterating the Message of the Prophets.

These persons are very easy to identify because they are given to making predictions and demonstrations, without previously having prepared a People with a Doctrinal foundation.

The V.M. SAMAEAL AUN WEOR came and gave the Message and all the indications to follow, for it would be absurd to think of taking away a People to an Exodus, without having prepared it previously in three aspects:

- 1- In a physical, mental and emotional regeneration
- 2- In a conscientisation of the Message and the Doctrine
- 3- In an integration of the People, to create a social harmony

Those people who seek places on earth to be safe, to make an Exodus with people of all different kinds, without any preparation, without chastity, without psychological death and without sacrifice; those are charletans, blind men trying to guide blind men.

These are not the plans of men, these are Divine plans. Beware of this kind of person!

We are in these studies to awaken, to have keen eyes and alert perception, not to follow, allowing ourselves to be taken in by any old fool, who like a parrot repeats the words which are taught him.

The hour has come to close ranks around CHRIST'S Doctrine, around the CHRIST, around Master SAMAEEL and his Doctrine.

It is not the time to be looking for easy ways, new Doctrines, new personalities; that which is being given to the People in these moments is no more than the continuation of the Samaelian Message, descifred, practised, lived and which contains the transcendental logic of the Being.

We invite our dear Gnostic brothers not to let themselves be taken in by individuals who adulterate the Doctrine in order to confuse people, who have no interest in humanity, who are only interested in being worshipped and who boast that Nostradamus was mistaken and use as their warhorse a teaching given by the Veaerable Master SAMAEEL which says: "*All these things will occur in the year Two Thousand Five Hundred* ", for such have they heard it and such do they interpret it, because their level of Inspiration is not enough to interpret the teaching esoterically.

Afterwards Master SAMAEEL explained to us that this teaching had to be interpreted cabalistically, not literally.

Dear Brothers, BEWARE, BEWARE, BEWARE ! because Satan wants to confuse us, and for this reason I say to you the same as CHRIST told us two thousand years ago: *“Remain alert, as in vigil in times of war and pray deeply to your Father so that you fall not into temptation”*.

## CHAPTER 8 : THAT PLACE

Everything we have said in this and other works which have preceded it, aim to make clear to the Gnostic People in our ranks everythig related to the events which will occur within a relatively short space of time; neither the time or the day matter, but so it shall be...

Remember brothers that on the earth no place is safe. In order to prepare the People or a person it is not necessary to go to the jungles, nor to listen to the banter of witches or the council of fortune tellers;the best place to prepare ourselves for an Exodus is where we are, for it is here that we are going to confront ourselves with the ego and with the world in order to win and triumph over our own darkness.

A person can go to the centre of the Amazon, but if they do not eliminate the ego, they continue being a rational animal and as we have said in this work, the animal species which are to inhabit the Island of the Exodus have already been taken there by the elemental Devas of Nature.

To go on the Exodus, we have to go as humans, not as humanoids.

*“Forward, Warriors of Aquarius ! May the power and the grace of Christ and the Guides of Humanity lead you to the Promised Land !”.*

May the deepest Peace regn in your hearts !.

**V.M. LAKHMSI**
