

THE AQUARIAN AGE

By

V. M. LAKHSMI

**At the crepuscule of this race,
Shines over an island in the Antilles
A Sun that brightens the conscience
Of the Peace seekers.**

**This Sun, as a Messiah,
Shall assist the Redemption
Of Humanity. From there we
Will behold the unveiled
And translated word of
The Fifth Angel of the Seven Horsemen.**

PROLOGUE

Since the dawn of time, mankind has always been assisted by the Venerable Masters of the *Divine White Brotherhood*, ineffable beings that in stellar and dangerous moments take a physical body to help, guide and lead men and women that have been obedient and respectful of the divine laws.

Today, as yesterday, our planet and the humanity sheltered in its womb, are found in their most transcendental phase: the transition from *The Pisces Age* to the *Aquarian Age*. For these reasons, right now humankind is covered by the densest darkness of *Pisces*, which eventually will have to clear away so that the *Aquarian Sun* shines.

Every bit of social degeneration, the political world chaos, the guerrilla wars, the ethnic and religious conflicts; the inflation that eats up the economically underprivileged, the insensitivity of the powerful; famine which day by day increases the number of its victims in different parts of the world; AIDS and stress, among other incurable diseases which defy and make a joke of the major strides that have been done so far by science and technology together; the atomic practices that destroy the marine plankton, coral reefs and life in all its manifestations; deforestation that mercilessly destroys the forests and jungles of the planet. The destruction of the ozone layer as well as the global changes of climate brought about by the grotesque human behavior, and the promotion of a technology that is offensive and disrespectful of the natural established order, are eloquent examples that suggest that the end of times is at hand.

What can be saved of all this? What is worthwhile saving of this world? The beloved Masters, who work endlessly to deliver to humanity the precise clues for its redemption and the norms by which the children of God should live by, have consistently provided the answer to these questions for a long time now. Notwithstanding, crowds make themselves deaf, contemptuous to wisdom and forgetful of all that is divine, yield to an easy way of life, surrendering to vices, descending by the inclined and slippery road of degeneration, which step by step gets them away of the *Divine Source* of all Being.

Nevertheless, is so much the greatness of the divine mercy, and grace from Heaven, that the *White Brethren*, never takes long in sending messengers of

peace; they are the bearers of a Christic message capable of illuminating the mind and fulfill with love the hearts of men and women that ought to be rescued. It is the time of cleansing the Earth of all that is useless, to unfold the divine plan and cosmic desiderata.

One of those great illuminating beings of the *Divine White Brotherhood* who has offered to serve humanity, is the *Venerable Master Lakshmi*; at these stellar instances he faithfully fulfills the sacred mission which was commissioned to him by the *Avatar of Aquarius*, the *Divine Logos Samael Aun Weor*: guiding the *Gnostic People of the World* to the Exodus that will allow it to enter victoriously to the *Aquarian Age*.

This book dealing about *The Aquarian Age* is an unequivocal signal and an evident testimony of the work of this Ineffable Being and of the infinite wisdom of his Internal Master. Any person with a serene mind and ridden of prejudices who reads this book, may enjoy the precious gems of divine inspiration molded in its pages, and the precise guidance needed by every initiate to travel safely and decidedly towards his encounter with his inner self, that is to say, with his *Internal Christ*, the only force that exists in the entire Cosmos, capable of unifying us with the *Father of all Creation*.

Aquarius will be an era of light, has told us *V. M. Lakshmi*, where intuition, love and wisdom will guide human actions and conduct. But before getting to these high stances, it is necessary to select first the seeds of all nature's creatures, to prepare the appropriate space and properly advise the chosen people, men and women capable of sacrificing everything to win it all, capable of renouncing to themselves and all earthly glory, to make them truly worthy of Heaven.

In this wonderful treatise, our Master invites us to light our own flame so as to clear up our darkness and complement our internal light with the *Light of the Christ* that shines and gives life to all Creation. In the present book our Master teaches us how to organize our Esoteric work so that our internal work will be fruitful; he shows us the prodigies of creation contained in the human seed, the sperm; he invites us to enjoy a healthy life, in harmony with *Mother Nature* and furnishes us with the essential tools so that everybody can follow his or her own path.

Notwithstanding, no one is fully authorized to unveil the content and show the integrity of the message that our *Venerable Master Lakshmi* gives in his

work, other than himself. For such reasons, we invite the reader to drink directly of the fountain, to enjoy and make his own the spring of wisdom compiled in this book, where, for the first time, a complete roadmap has been traced to come into *The Aquarian Age*.

Enjoy it...!

ELEUTERIO MARTINEZ

Chap. 1

THE AQUARIAN AGE

As it is known by the entire Gnostic student body and by all the people who study some texts related with evolution, related with the times at hand and that perhaps do not have some things clear about this stellar and astrological phenomenon.

The Aquarian Age is an Age of Light; it is directed by the COSMIC CHRIST and corresponds to the element air, movement. This is the reason why it has been, is and will be very difficult and painful to go through the horrible transition from the Pisces Age to the Aquarian Age.

It is only natural, that as well as the races which have preceded ours, who have been swallowed by the element water; we can clearly see the phenomenon that is currently occurring and as I have said for the restless seekers, the phenomenon that will come to pass.

Life emerges from the waters by natural law. Continents had to pass through this same phenomenon; water vomits them, and there life is created with all of its manifestations.

By the end of their mission these continents, their interior element fire triggered by great events, telluric movements, earthquakes, tsunamis, etc. emerge to the surface of the Earth bathing it with liquid fire, eliminating all contaminations and burning many meters within and many kilometers high, leaving no trace of what once was a perverse mankind that had caused all kinds of recklessness, violations and destruction to nature.

Once the liquid fire of the Earth's interior has caused this great holocaust, then the Earth will shake horrendously reminding us those words that appear in the biblical texts: "No rock will be standing of what once was a perfidious humanity; that the heavens and the earth shall pass, but, the word of the Christ will not pass..." It will be kept as it was written!

These telluric movements will produce the splitting of continents currently inhabited by humankind.

Those men and women that have been taken out in a biblical exodus will see these continents. This event will be similar to the transcendental phenomenon of seeing blue whales, marine monsters, when they emerge and then sink, becoming invisible to human sight; leaving in its place great foamy waves, from where once emerged our continents, within its womb, so that mankind would inhabit Earth...

Brothers, this transcendental phenomenon of nature reminds us of the mystery of: *IGNIS NATURA RENOVATUR INTEGRAM*, the fire renews nature incessantly.

The human being has the power to utilize the fire of his own interior, wisely with the alchemistic processes to purify himself, avoiding thus that nature, through a phenomenon similar to the one suffered by the planet, disintegrates and swallows him for millenary ages to the submerged regions of nature.

The current inhabited continents shall witness in a near future what is being spoken off here. And the souls of the chosen ones will delight watching the phenomenon as it comes to pass.

After this extraordinary and Dantesque event had pass, it will not take a long time where new shivering and terrifying events will be produced, and the souls of those chosen having remained in a safe place, in a mathematical meridian of the Fourth Coordinate, shall experience the ecstasy of seeing the Sun appear in a different orient than the one that we know today; showing us how from the ocean depth, live representation of life, emerge new continents, inducing us to believe that the process of life in our planet goes on, so that in the posterity may give shelter to the *SIXTH GRAT ROOT RACE*, that will be named *CORADI*, fulfilling the biblical desiderate: "This humankind will be exterminated by the fire. As we have said, this is none other than the liquid fire of the Earth's interior.

It is clear that before these natural events happen, man would have produced the great atomic conflagration, a culmination of the Third World War that it will have to occur...

It is clear that the men that will make this nuclear war, atomic, at a certain time will feel as the masters and owners of this anguished world. The

vanquishers will be honored with many laurel crowns, and the Nobel Prize of Peace, and upon them will be bestowed the titles of heroes in a war of cowards against defenseless creatures that at no time have been opposed to their systems, nor bathed the world in blood.

These people, powerful in crime and barbaric, shall melt with all their arsenal, remaining only a black dot inside of that fire that will have to be at that moment of an utmost incandescence, so as to erase even the slightest consequences of hatred, arrogance and the crime of these wicked scientists, that as I have said, will be the executioners who will exterminate even the last innocent creature of this humanity...

In this way the following sentence of wisdom will be fulfilled: "Death gives way to life, and life gives way to death".

Chap. 2

**PREPARATION TO ENTER
THE AQUARIAN AGE**

Being The Aquarian Age one of Light, directed by the Zephyrus CHOKMACH and the element air:

It must be understood that it is of an utmost importance for every person aspiring to be admitted to this extraordinary and transcendental event, to help enlarge the crowds that will inhabit with a physical body on the Aquarian Age.

It must be understood that since it is an age of light, we cannot enter in it in darkness; for this, we should devote ourselves once and for all, to create our own light within us, that is to say: ¡Awakening of the Conscience!

All of our Gnostic students know that the darkness within us is none other than a live representation of all those subhuman elements that we carry within ourselves, and that we should set our goal of getting acquainted with, comprehend and eliminate them, with techniques delivered to us by the Venerable Master SAMAE L AUN WEOR.

We cannot be fooled to think that we will be inhabitants of The Aquarian Age if we keep on being as we are.

The Light of Aquarius should have a transcendental encounter with the light that we have created in us through the Gnostic super discipline.

Do not forget dear brother, that the world is wrapped in a devilish spell, which inhibits us to emancipate ourselves without having done first an extraordinary effort.

The Light within us is completely necessary so we can visualize the path.

The Aquarian Age is guided by CHOKMACH, the COSMIC CHRIST.

The CHRIST is the Light. So that the COSMIC CHRIST can set us free, it is necessary that the light of our INTIMATE CHRIST shine in our hearts.

This way the extraordinary symbiosis of the interior Light and the exterior Light shall take place in spiritual harmony.

Our Gnostic brothers need to begin the task of working intensely in the Work traced and directed by the CHRIST, to integrate within us the five fundamental and essential conditions in this luminous Work. They are:

- 1st. Disinterested Sacrifice for Humanity.
- 2nd. Scientific Chastity.
- 3rd. Self Denial.
- 4th. Disintegration of the Psychological Aggregates.
- 5th. And an absolute forgiveness of all Trespasses.

THE CHRIST as it is known to all, is an extraordinary power filling all the emptiness in our minds, in our own psyches and in our conscience, when by a work well done, we have eliminated the elements that once we carried.

THE CHRIST, by the ETHER OF LIFE, nourishes and quiets the elements: Earth, Water, Air and Fire, so that they can, in turn, mutate, filling the planet with life.

We need, through a right form of living, change the way we feel, think and act, to fill ourselves with that ETHER OF LIFE so that our interior elements also make their mutations, filling us with life, harmony and peace.

The element Air in us, produces great emotional and mental convulsions, and should be mutated into noble thoughts of altruism, faith and security.

Emotions should be mutated in moments of meditation, prayer, peace and love.

The element Earth that produces within us the inertia, laziness, and unwillingness, should be mutated in movement, diligence, work, physical-esoteric exercises, filling us with prana and happiness.

The element Water, that produces within us a state of melancholy, lust, lasciviousness, should be mutated into altruism, happiness, and inspiration, through the pranic exercises, pranayama and inspiration.

The element Fire, that produces within us a terrible state of anger, arrogance, violence, should be transmuted within us through silence, meditation, prayer, and comprehension, in humbleness, self-assurance and love.

As you see, dear reader, the preparation for coming into The Aquarian Age must be in accordance with every aspect proper of the Christ.

As we have said, the Light and Movement are autonomous parts of the same CHRIST. It would be unjustified to think that our Work could be performed within the contexts of inertia, laziness, unwillingness, passions and reasoning.

The movement that imposes The Aquarian Age upon nature and within us humans invites us to reflect upon the notion that the AQUARIAN IS THE INTUITION AGE. If we want to continue controlling the destiny of our lives with the mind, we would be too far behind in our spiritual development to be able to enter The Aquarian Age.

The mind is the slowest center of our human machine; in increasing speed of reaction follows the movement center; after that comes the emotional center, then follows the instinct center and finally the sexual center.

We would like to clarify matters for a better comprehension. From top to bottom each center reacts faster, meaning that the sexual center is the fastest of them all. This has an esoteric explanation: the sexual center is in effect the generator of the Christic energy, CHRIST himself.

The only faculty that the human being has, faster than these five centers, lies in the heart: the INTUITION, this is so that we can manage with knowledge and wisdom the heavy hydrogens which will be processed in these five cylinders of the human machine.

It is necessary that we get to the task within our daily lives, of developing our intuitional world. This is achieved through the Gnostic discipline, observation, auto-observation, inspiration, devotion and adoration.

He, who proceeds in this manner, will not have time for thinking in ambiguous or useless things; he only has time for observing what he is doing, what is in his surroundings; only has time for auto-observation: What is he thinking? What is he feeling?

He has only time to be inspired by the beautiful things found in nature created by the Divine Maker.

He has only time for devotion, to pray asking for him, for humanity, receiving the bread of transubstantiation to fill himself with peace and happiness, and at time of rest, adore the ALMIGHTY from his heart.

Time is relative, when you do not know how to use it wisely. When it is employed properly, we can compress its relativity to a point, an eternal now and a heart.

Chap. 3

WAY OF LIVING

Every person who is interested in being an inhabitant of The Aquarian Age should be in accordance with the physical and cosmic demands of this age.

They should comprehend the immense need that we have to really make radical changes in behavior, such as:

- Way of thinking.
- Way of feeling.
- Way of acting.
- Way of being.
- Way of eating.
- Way of resting.
- Way of working.
- Way of teaching.
- Way of learning, etc.

Each one of these aspects begs for a deep reflection of changing the old structures for new ones promoted by new and revolutionary teachings, proper of The Aquarian Age. With such goal in mind we will next analyze the Way of Thinking.

We would say that for a thought for which a detailed study and analysis has not been entertained, we cannot give an opinion, because the thought could arise from a given subjective element that has nothing to do with the Work that we are carrying out.

It is of an utmost importance, dear reader, to see the difference from he who thinks and the thinker. Let us make a clarification in pursue of finding the reason for having a thought.

A thought can be triggered by three kinds of forces, such as:

1. A psychological aggregate.

2. Sometimes a person thinks integrating his level of comprehension.
3. And, in some individuals, the BEING expresses itself through the Superior mind.

A person who studies and practices the Christic Esoteric Doctrine ought to turn himself all too demanding with his way of thinking, this means: A given person who keeps thinking about anything, who does not know the origin of the thought, who does not know what Ego is the source of that thought, and gets used to live in such a way, needs to get serious about these studies.

Is like a professor that has a class to look after and lets his students do as they please, meaning, that he is not fit to be an educator, because he lacks seriousness, discipline and responsibility.

We should thus realize that those conflictive, disorganized, thoughts are product of the egos (Selves) that need to be studied, comprehended in the daily life, with the intent of eliminating them and begin to form within us a center of gravity around the Doctrinal body and of the education, that we ought to have as a re-indoctrination to enter into our psychological work proper of a mystical death.

The life of a serious Gnostic student should be geared in an orderly fashion towards the goal of forming the necessary basis that will allow him to achieve a global knowledge of what constitutes the subjective elements that prevent his spiritual balance.

The life of a Gnostic student should be associated with mystic, comprehension, will power and a profound craving to re-establish a solid link with God.

This way he will prevent that the unsatisfied egos at determined instances take away his desire or impulse to accomplish a Work.

Each time that the death of an aggregate takes place within the psyche, it triggers in the physical body truly painful processes, huge emotional states, because several elements that for many years have kept us company are no longer bonded to us.

Once we have overcome these emotional states, peace and harmony will reign. This, in itself, is the way the autonomous parts of our Being are

integrated within us, as they get rid of the fetters they were attached to by the given subjective element.

The Gnostic that is doing his Work, ought to visit the countryside, ought to listen to selected classical music, ought to commit himself to do good deeds, ought to read the Sacred Scriptures, never should be absent from the rituals, chains; he will thus maintain a harmony with the forces that will re-animate and stimulate him to continue his voyage.

Chap. 4

SELECTION OF WORKING AREAS

As it is known by Gnostic students, when a person does not put his work in order he is at odds with the route he should take so as to continue his work, it means, one day he does a certain type of work, another day another, without following a sequence so as to collect the fruitfulness of each one of the tasks that he attempts to fulfill. Let us take, for instance, the meditation.

It is necessary that we meditate at least an hour every day. This can be accomplished, if the circumstances permit us, any time of day. If it is quite impossible to do so during the day, it can be done at nighttime, preferably from ten to twelve midnight, or at dawn, between three and five in the morning.

This meditation ought to be done combining the prayers and adoration of the Intimate, asking for illumination; in this way we will be able to merge the conscience with the Light, and at the same time, we will be able to awaken our conscience and strengthen ourselves so as to keep struggling with the different dramas of life, without being victims of the Ego's attacks, that on many occasions make it impossible for us to continue with our work.

Every person who wishes to advance in these studies, ought to be serious about them, responsible, disciplined, so that he can be sustained in his path and have objective living proofs of the Doctrinal body, making a re-education of his senses, of his breathing, his food intake, his hygiene, and his behavior with the ones around them.

The person in question should not allow his sense of hearing, for example, to listen to, even if he likes it, to a strident music, double sense jokes, quarrels, controversies, politics, and all that is known to hurt certain susceptibility in the harmony that is being developed at a level of the extra-sensory perception, because it could damage them.

The person should not allow his sense of sight, to get to see barbaric scenes, war movies, morbidity, magazines, newspapers which show unsuitable scenes which can damage the delicacy and purity of our imaginary center and would produce big waves in the lake of our minds, which should remain still and serene...

By no means he should allow his word be turned anytime into an instrument of the Ego, launching offenses, insults, lies, gossip and anything that would harm the geometric, four-dimensional form of the word.

The person should not allow his imagination to take him through a subjective world, ruining the petal of the Lilac Alexandria of the Divine clairvoyance.

There must be a super discipline in the Work, so that when the above negative phenomena appear, he will know how to act.

Dear reader, the negative emotions are fought with inspiration; the negative thoughts are fought with inspiration; the negative instincts are fought with inspiration.

This means INSPIRATION is the weapon that we, the studios of this science, dispose of for arising our Level of Being.

Inspiration is God within us. As we have stated above, it is not fair or reasonable that a person who leads a disorganized life, who does not keep hygiene in his body, in his house, in his home; who does not have a mental hygiene, does not have control of his instincts and emotions, think that he will be able to be an inspired candidate for the Aquarian Age.

Chap. 5

HEALTH

It is important that the Gnostic students and prospects to be rescued in the exodus understand that the physical body is the fundamental part of Alchemy, and that only through the different steps of Alchemy we can be able to ascend to the superior spheres of knowledge and Wisdom.

The physical body is a planetary body which as well as it is made up of atoms, molecules and cells, it also has in its interior a solar system, and thus a zodiac.

It is known by the studios of the Gnostic Science that each one of the twelve signs of the zodiac has its corresponding salt; and that the planets of our solar system have their respective metals. Each one of these substances is to be present in our Work, because if not, our physical body will not be capable of responding to the demands of the Work we are doing.

A physical body malnourished, abused, in this age in which the vital part of the planet has decreased so much, would not have the sufficient resources needed for the creation and crystallization of the Existential Bodies of the Being.

As we know, the body is nourished with what we think, what we feel, and what we eat. If we think negatively, for example, thoughts of hatred, greediness, fright, lust, pessimism, insecurity, misery, etc., that body would be charged with hydrogens and tamasics, too dense to overcome and would trigger failures in what we are attempting to carry out.

If our feelings are filled with hatred, love for oneself, pride, greediness, envy, etc., what can we expect to be the result of the Work we are carrying out?

We would be faced into a true downfall, because we would be trying to perform within ourselves a phenomenon of incalculable proportions. This would be equivalent to having ten wagons of a train, and at each end we added a locomotive, each pulling towards an opposite direction. It means that it is impossible to carry out an objective work.

What we eat constitutes another aspect that needs to be understood, because from there emanates the necessary material that our body needs for the elaboration of hydrogen SI-12 (Semen).

This semen is the creative energy that we will utilize for our Great Work. This energy is composed of sperms, which carry within themselves the elements: earth, water, air, fire, and ether.

The earth is its body, the water is its vitality, the air is its impulse, the fire is its energy, and the ether is its conscience.

If there is not a balance in our food intake, these sperms might not be suitable to perform the Great Work.

From the very outset the Venerable Master Samael has told us enough on the pankatawa ritual, showing thus the necessity of keeping a balance and equidistance in the food intake that we consume in our daily living.

We have been taught that cereals and whole grains correspond to the element earth; that fish, and salads of garden produce correspond to water; that natural grape juice corresponds to air; that red meat corresponds to fire; and that transmutation corresponds to ether.

Here we can observe a balance between the elements of nature and the food we consume to crystallize the Work in every one of us. But in this matter we ought to go further studying each particular case due to the times we live in. By way of example, the body needs a right balance in our consumption of vitamins, proteins and minerals.

Time has come brothers and sisters, to acquire a more reasonable knowledge of the Doctrinal body and of the instruments and elements that are needed for the realization of the Great Work.

If the physical body is not fully prepared for funneling the cosmic energies, metabolize and convert them into appropriate forces for the **WORK THAT WE ARE DOING**, we would not be able to reach a higher level of the work, for reasons that we all know, such as the premature decay of the physical body, of its centers, that regrettably would affect part of the **WORK**.

Chap. 6

THE FIELD

In this chapter we will analyze several aspects related with our work.

Country fields are places where a variety of features are blended and that we ought to know about.

Urban life, nowadays, is too convulsive, causing stress stages, physical decay, states of identification and, as is only natural, the forgetting of our own self.

Every one knows they have stress, but my question is: How to cure it?

There are many people and schools who provide ways to help people handle stress. We do not deny that these procedures can be mitigating, but through them a total cure cannot be obtained, the reason being that stress is an illness that triggers enormous convulsions in our mind, our vital substance, our emotional center, our instinct center, our motor center, our neuromuscular system, etc.

It means that it is not a matter of massages or taking vitamins, or proteins; as we have said, they can provide some relief, but are not the cure.

The countryside is a host of natural resources that should not be overseen, such as: pure air, long walks, bathing with waters cascading the mountains; the pranayama practices which should be done there; the practice of burying a person in the earth.

The above practices have multiple benefits for our health, since the element Earth is in contact with our bodies, thus displacing bio-electromagnetic energy that pass through all of our tissues, neuromuscular system, blood system, circulatory, eliminating all kinds of fluids that accumulate in our daily living in our organism by the tensions and contamination.

This energy of the earth, when passing through our body, revitalizes it, allowing, as we have stated above, the psychical, mental, and emotional elimination of some stressed states of daily life.

As the flowing waters of the rivers, and cascades, hit the body, it surrounds it with vital energy, which cleans the aura of every noxious and morbid element that is picked up from unhealthy, and convulsive places.

Baths with aromatic plants produce in the physical body and vital substance a better harmony to reestablish the lost powers; as a result the astral body or protoplasmatic body will have a better action in our circulatory, neuromuscular and spinal-cerebral systems; and in turn, more light, better expressed internal motions, and at the same time, the protoplasmatic body or astral body, will have a better correlation with the molecular body, and mental body, achieving thus in them a musical harmony which would lead us to the encounter of that internal judgment, essential foundation to awaken conscience in the superior worlds.

Chap. 7

ENTERING THE AQUARIAN AGE

Being the Aquarius Era the point where the light and the movement converge, that would help make great changes in the human mind, it would be absurd that we intended to be still, not doing a bit for ourselves, as much as in the physical part as in the spiritual part. We would be behind and converted into recyclable material to be used by Nature.

All systems found nowadays shall disappear in The Aquarian Age.

The political system that will take place will be COOPERATION, common well-being, mutual help of all mankind, and the joint effort as a norm for communities' survival.

The religious system will be concentrated in the fact that every human being understands that he stems from God, will remain unified to HIM through his work and the fulfillment of the Law; and his goal is to return to HIM after departure from life.

The mystery of life and death known to mankind in the Aquarian Age will simply be, the change of physical matter by another.

Every person will be aware of this process and his craving will always be, as he goes through his physical life, to serve humanity and God.

The cult of God will be rendered throughout the transubstantiation, through alchemy and throughout the rites of agriculture.

The economic system will be guided by Banks of Social Assistance, which consist of a general coverage of food, medicines and education.

Every community will have these services, which will be supervised by eminent people of the same community.

Agriculture will be distributed from its seedlings, making sure that there will be enough food for the whole population.

Centers for Public Health Assistance will be properly endowed with the necessary personnel, prepared to provide assistance to all the people who are in need of health treatment.

At no time, will the social assistance banks become negligent to any person, thus fulfilling the command of COOPERATION.

The educational systems will begin functioning to every person, informing them of the processes that they ought to live by at every different stage of their lives.

When the time is due for every person to establish a home, they will receive a thorough education about the behavior that they ought to exhibit: mentally, psychologically and animistic with their mates.

This education will permit leading wisely the MATRIMONIAL wedlock, and the great GURUS will inform when they are permitted to bear children. That couple, at the moment of receiving such an order, will be internally and physically prepared for the mission in question.

When the child is born, he will be left for some time with his mother so she can provide her love, which translates into strength and harmony to the child.

At two hundred and ten days (210), that child will begin to receive an education that consists of works with nature, made by wizard Priests that will present him to the Gods of each of the elements so that they will assist him in every development of his faculties and growth.

By this way the child, by no means, will loose his faculties or attributes, which has brought with him from his mother's womb.

The Geniuses of the Earth will keep alive in him the sense of taste and the faculty of agriculture.

The Geniuses of the water will keep alive and in activity in him the sense of smell and the faculty of fishing, and the Alchemy.

The Geniuses of the Air will keep alive in him the sense of hearing and the faculty of teaching and learning.

The Geniuses of the Fire will keep active in him the sense of sight, contemplation.

The Geniuses of Ether will keep active in him the sense of touch and the faculty of adoration.

In this manner, men and women will rise bringing about from their interior, their own faculties of the Spirit, bestowed upon them by the Geniuses of Nature as a testimony of men, Kings of Nature.

In this manner, children would not loose their INTUITION, element Earth; the superior emotion, element Water; the superior mind, element Fire; the imagination, element Air, clairvoyance.

The presence of these faculties keep man in steadfast pursue of a constant internal contemplation, the element Ether.

Never ever, will we in the Aquarian Age, observe people dragging along ambiguous and degenerate customs of the Pisces Age, so then, it is necessary to begin breaking with all the links we have with the actual systems, and begin forming a rich interior life; begin to get accustomed to the countryside; having as said above, an education on what foods to consume. Develop a discipline on our sleeping hours or rest; and a discipline on every one of the sensory systems, so we can have a balanced formation to respond to the requirements that are imposed upon us in the fields of peace. Where the chosen people will enrapt listening to the wise teachings of the Saint Gurus, of the Masters of the White Brotherhood, who at the present time struggle for the salvation of humanity.

Chap. 8

RECITAL

At the dawn of a spring day, looking at the colors of flowers and at the mist on the leaves. The leaves waiting for the Sun, with its magnified Force; the mist awaiting evaporation. Flowers giving a spectacle in the field and the droplets waiting to ascend and convert later on into rain drops... I told myself, those droplets would evaporate when the Sun comes out and these flowers will increase their color...

My organism revives to begin my chores, but ...what a pain! As the day passes and night comes, I do not see the Sun's work gestating creatures to hoist and magnify this world. Maybe just the opposite!

Each day, illusions wither when it sees mankind's hope drawback...

Moon nights, stellar nights call onto us to reflect upon, sunny days passing through our mind without leaving a trace as an incentive for the human heart.

It seems natural that people repeat day by day the same chores hoping that their vital functions come to a stop some day, to rest...

Biological functions that by no means extol the Spirit, but on the contrary, degrade man pushing him until converting him into a senseless organism, dead and decomposed, worthy of telling the world, I leave thee what I have done, I leave thee what I was, nothing I take with me.

The saddest thing is, that if there are no worthy deeds done through effort and conscientious work, when in the presence of the Supreme Being, we will not be able to say: My Lord, my vital functions have ended, I have left the world what it deserves, and I give thee your fruits: A SOLAR MAN!

Days pass by, nights pass by...
The Real Man does not pass...

He remains as a testimony that death will not obliterate the Son of Man, because he would always be active and proud, sometimes with organic functions in vigor, other times with spiritual inorganic functions.

So, my dear reader, it is necessary to sing prayers of love to the stars, in reward for the colors they give us, it is necessary to kneel at the Sun, giving thanks for its light and warmth.

It is necessary to rhyme our stanzas with melodious songs to the fields, demonstrating this way that we are part of them!

It is necessary that from our inspired heart come out the noblest feelings of gratitude and Love, for those ineffable Gods that have come to teach us.

It is necessary that we throw onto space our breath full of harmony and grace so that they will settle in the hurting hearts of a poor mankind, that compelled by a fratricide hatred, without God and without grace, is heading to their own destruction.

There have been times that from the majestic peaks of Olympus. Have arrived the pure aromas of those maidens that once witnessed the dawn of our universe; notwithstanding they still keep within their hearts hope that in our anguished world there are souls dressed with valor, courage, able to withstand and engage in a symbolic voyage; carrying in their conscience, recollections of difficult times and of stories from the past, leaving a bloody heart for a love that has not found an answer, of a humanity that has fallen, that has not had the courage to confront to the storms of a corrupted world, that has destroyed all possibilities of a Human Redemption.

Chap.9

THE END OF TIME

As Jesus was with his disciples He said: “My children, it is necessary to go to the country and speak about the end”.

So they went out and as they were traveling, he was telling them: “A path is passed over many times, and not for this reason it is known. The path that is covered during the daytime is different to the one covered at nighttime. In the day, it is seen by the sunlight, in the night we do not see it because of the darkness, nevertheless, it is the same path”.

John says: “Master, what do you mean by this? The Master answers: “John, the Sun that we see shines on us, it lends its light, but it does not belong to us”.

They kept silent and Peter said: “Master, that Sun is not ours, but it shines on us, true?”

The Master kept silent and after some time said:

“Man is not integrated in his ideas, he feels satisfied by using things, even if they do not belong to him. Man should behave like the Father who is in secrecy...He has all it takes to make us be the inheritors; He shines on the countryside and the oceans with the Sun. Man should illuminate his mind and his heart with his conscience, and like the Sun, will shine onto the world and many other worlds, because he has his own Sun. I say these things to you, my children, because days will come, time will come when not even the present Sun that the Father lends us, will shine; and that is the time when you will need your own Sun to provide your own light”.

“Do not do like those fatuous women, who by not being foreseers, their lamps had no oil, may not the same happen to you, by not being foreseers and by not creating your own interior Sun you may be in darkness forever”.

Judas says: “ Master, but if you have told us that you are the Light that shine onto the worlds, and that we are with thee, even then is it possible for us to stay in darkness?”

The Master says: “Judas Iscariot, a tree gives fruit so that man can eat, but it is so benevolent HE who sent me, that within the fruit that is your food, is the seed so you can plant it and later on feed yourself with its fruits”.

Judas says: “Master, I understand, but while that seed gives fruit, what must he who ate it do?”

The Master says: “In life, the past, and the future are brothers in an eternal now. Do not get confused Judas, eat the fruit and plant the seed, that the future in which the seed will render its fruits, it is also *now*, after all.”

“HE who has sent me, has many fruits that others have planted, like the fruit that today I am planting in thee.”

“Because nothing of what there is under the Sun is new. Everything has existed and the fruit of a good tree has been rendered, because I have been present in it.”

“My children, my Kingdom is not of this world, my Kingdom belongs to the Kingdom of HE who sent me, so I say to thee, do not worry for the kingdoms of this world, but worry for being Kings of the heaven and in this way we shall all be clustered around HE who sent me”.

Peter says: “Master, when you retire, will you be accompanying us and delivering us your holy teachings?”.

The Master says: “Even when you were not my disciples, I had always accompanied you, and taught you, but you did not recognize me; I did beat in your hearts, I guarded your sleep and you did not recognize me. I gave you all variety of fruits from the countryside and you did not identify me. I gave you pure air to breathe and you did not notice. I had showed you the Laws through the prophets and you did not listen.”

They all kept silent once again. And observing the horizon he took a deep breath and said:

“Times are near when men will be blinded and turned against each other looking for power, and will use every possible means so that the powerful destroy the weak, and will be pray of horrible demons of the abyss, and this

will bring about that great natural forces be loose with all its fury making rains of fire fall against mankind that will destroy every living being.”

“My children, I tell thee that if you do not stay obedient to my teachings and in alert not to fall to temptations, you will be tempted, and the wolves that shall come out from the abyss shall deceive you, and the punishment of disobedience will fall upon thee.”

“It is necessary, that after my departure you go to the cities and the country land preaching my gospel and teaching the word that Redeems mankind.”

Chap. 10

THE PROCESS OF THE PEOPLE

In this book which you hold in your hands and that I expect you to be able to understand as you read it, I am telling you, dear reader, that all methods and clues necessary for the reivindication with God are being delivered to the studious people of this age.

In these instances as I write these lines, my heart overwhelms with those feelings that I have had in the ages accompanying the Redeemer of the World, which delighted my heart; and that today, thanks to the presence of the CHRIST in his Doctrine, I can tell my dearest brothers, that I will fight till death for the Doctrine of Human Redemption, being a testimony to the CHRIST that his teachings have been housed in my heart and my conscience during twenty centuries, so that today I can deliver these messages needed by mankind in their path of Redemption.

It is a great honor for me, to be at these moments an authentic disciple of the White Brotherhood, accompanying my Redeemer in the path of his way of the cross, helping the people, full of Love and hope, take the course of Human Redemption...
